## Fire

## If a fire alarm sounds:

- 1. Check the door for heat and signs of smoke.
- 2. If there is no smoke observed, proceed to the nearest exit. Do not use elevators!
- 3. Close all doors behind you.
- 4. Assist people with special needs in evacuation.
- 5. After evacuating, go to the designated meeting area of your building.
- 6. Notify fire personnel if you suspect someone is trapped inside.
- 7. If you are trapped in a room or building:
  - Place wet objects into openings to prevent smoke from entering.
  - Hang an object out of the window to signal that the room is occupied.
  - If smoke enters, keep your head at least 8-12 inches off of the floor.
  - Call Security and advise them of the location.
