**EnergyVenture Camp**

EnergyVenture Camp is a 36-hour energy career exploration summer camp for middle-school and high-school students between the ages of 12 and 14. It focuses on the energy industry and career opportunities in the field. EnergyVenture blends fun and education to introduce students to the region’s ever-changing energy industry. Campers perform hands-on lab experiments, participate in team-building activities, win prizes for team efforts, tour an energy-related production facility, and get first-hand accounts from guest speakers who work in the field.

The program’s dynamic week-long experience is unique. Students also are invited to return to campus during the spring for an annual reunion where they can catch up with old friends and get re-engaged with the college and the industry. Camp scholarships pay for the expenses associated with the camp including snacks, field trips, camp apparel, and supplies. There is no cost to students who qualify.
