Karen Guthmiller made motion; Keith Coleman seconded. Passes unanimously.

2. Informational Items

a. Veronique Tran

The AGCM has courses scheduled for deletion and archived, so are a given when published like that. If they stay in our catalog and we offer the course then we will not get funding for those courses. It is to our benefit to align ourselves to the published schedules. How the process is working now; is there something that Dr. Tran's office could help with to try and streamline the process. Maybe to go through them and send the Division Chairs and/or Dean's that these are the classes scheduled for deletion, or does it need CAAC submission. There isn't a need for voting, as it is final when published in the AGCM. They should be disseminated to the divisions. Troy should be able to create the check box for "State mandated change" to only trigger it as an informational item not a level 2, but it will report it so that it can be included on the Agenda. This way there is a form of Minutes for it.

We have the Curriculum Management System and the CAAC Minutes. It would be useful to have some other kind of web based cataloging of decisions by course. If CAAC is wanting to explore this idea, we can meet with Roger Demary and see what can be generated. It could be an excel spreadsheet with the translations of the CAAC Minutes on it.

b. Onimi Wilcox / Layton Childress / Dr. Wilcox

Appears that in some cases when course substitutions are made we are going way back into old catalogs. CAAC doesn't handle the individualized issues, but will address the programmatic standpoint.

c. Layton Childress

When reviewing the items submitted for CAAC, do you ever call the individual that entered the item if you have a question about it? I haven't received a call in about 5 years or so.

This is why we change the 1 week review to 2 weeks, so there is enough time for review.

d. Scott Bennett

Next fall we intend to roll out an attendance tracker in myLC campus. Wait listing is available with PeopleSoft.

We started do electronic substitutions on Aug. 23, 2016. Since this time we have done 991 substitutions. We are substituting the same things over and over. The majority of the substitutions are approved.

e. Paul Arrigo

We have had one item for Academic Integrity, a focus group with faculty on the survey that was done last spring.
