

Logistics

Logistics is the planning, direction, or coordination of transportation, storage, or distribution activities in accordance with organizational policies and applicable government laws or regulations.

Logistics encompasses several different occupations, with a great variation in both the training and the salaries that workers can expect.

Two Pathways

Lee College offers two pathways for those interested in Logistics

• Credit Courses

The first way to study logistics at Lee College is through our credit program, in which students can earn an Associate of Applied Science degree (LOG2) or a Certificate of Completion (LOG1) in [Logistics and Supply Chain Management](#).

• Workforce Training

The other pathway for studying Logistics is through the Lee College [Center for Workforce and Community Development](#), which offers non-credit training in Logistics, Warehouse, and Distribution.
