

Equity Statement

Lee College commits to creating and sustaining an equitable environment. Our goal is for students, staff, faculty, and administration to grow and achieve their personal and educational potential. We recognize that our community comes from diverse backgrounds and that our student population enters the college at different starting points. Our commitment to equity bridges opportunities by closing educational gaps and dismantling systemic barriers for historically under-resourced students. Our stance is that equity differs from equality. Equality assumes the equal distribution of resources will produce equal results. By contrast, equity seeks to achieve equal results by accounting for multidimensional perspectives and directing resources and access to meet individualized needs. Operating through an equity lens is central to the college's mission in maintaining a holistic ideal student experience.
